

Hello, Wish health to you. I have received enough money this month.

Now the epidemic season is getting more complicated, so we restrict ourselves from going out. We no longer go to school, and the children are assigned homework to review, so Uen and I instruct them to do the homework themselves.

I also help with the kitchen, because the season is difficult to travel, so in addition to making banana bread, we also make extra cakes and dried bananas to earn more income. Last night we also awoke to prayer and adoration with Pope Francis to receive the entire indulgence. I offer everyone to God.

Every day I also read the news about the epidemic. The number of infected and dying people is too much, now increasing in big countries like Italy and America. I love them so much, so I can only pray to God, I offer prayers for all my family, for all my benefactors, I pray that God will keep everyone in the world alive.

May God always accompany you and everyone in FVSO. Wishing you a lot of blessing and happy weekend.

Y Rem Vinh Son 6
