

Another month has passed, are you still fine? I am still very well, I have received the scholarship money this month, I would like to thank you very much.

Up to now, my school has not informed me about going back to school yet, so most of the time I have gone to work. I spend the whole day working at the diner, and I spend some time reviewing my knowledge or homework assigned by my teachers. If I miss school long, I will forget all my knowledge! I really want to go back to school because my teachers are teaching online but it is not as effective as listening directly to teachers in the classroom. I'm really sad about that.

You and I know it, it was the pandemic virus that made things different. The school is off, the shops stop trading, the price of masks also increases, the items needed to prevent disease also increase a lot compared to before. Currently in my country is very strict. Even the celebration of Mass at churches must also stop for the safety of everyone. Thereby, you and I can see the danger of it.

I still pray for everyone to be safe and secure in the arms of God. Hopefully you and all the benefactors will always be healthy and peaceful in this pandemic. Because your love is great, I believe that God will eradicate the disease. You and me, please pray together.

I wish you always happy, peaceful, and energetic of God. I love you all very much!
