

Dear FVSO Association.

First of all, I have some words to say about your health, how are you guys! Still healthy? I am fine. Besides, I also apologize to you, for my lack of work by sending the report last month directly via the messenger because my email was not working. I'm very sorry and I hope you both sympathize. I will talk about my activities in the past week. At the moment, we cannot go to school yet, we are allowed to take a break from the school to avoid the epidemic season. So I went back to Vinh Son to help clean, watch the kids and do the chores in the house. One day I worked in the fields, we worked as: cutting grass, watering coffee and fertilizing, etc.

Once again I would like to thank you or your help, attention and love. I do not know what to say more than praying and good health, may God pour peace to you and everyone at the same time to sanctify your work and always accompany them. Especially in the middle of this epidemic, please God always preserve and protect from the outbreak.

A Phuc. Vinh Son 6
