

Dearest mom and Dad,

First of all, let me send you my best wishes. I am fine here, everything is ok for me.

In April because of Covid-19, I stay in Vinh Son to help teach students. In Vinh Son 6 we divided the schedule to guide students to study, so in the month I tutored elementary and junior high school students and sometimes taught and solved lessons for students high school. My daily work guide students to study and do their homework.

Even so, I still have a lot of time to read books, play musical instruments for entertainment. The work became more interesting and more fun when the children liked me to teach, they obediently did the school assignments. I often played guitar and the children would sing, they were very excited to sing like that. Although my playing ability is not good yet. And at noon I usually sleep in the same room as the kindergarten kids to watch their naps.

Children in Vinh Son and I are healthy and because we are rural and far away from the national highway, we rarely interact with people outside during quarantine.

Day by day the small joys of the day create happiness for the whole day. I have a bad habit that is procrastination, I have set or plan for myself: for example, I will read about 20 pages a day, but some days I only read about 15 pages. . That's why I'm trying to give myself a more disciplined and consistent attitude to be able to solve or complete the work as planned.

About learning:

Yesterday 4/5 I officially returned to elementary school to practice and the internship period will last from 4 /5-14/6. This time we had to go to school very early to instruct students to line up for measure the temperature when students entered the school. In class all of us wear mask.

After finishing the internship I will return to school to complete the remaining 3 subjects. My school has not yet announced the exact date of my graduation when the school notifies me I will notify you.

During this internship I will try my best to finish well on my practice,

At the end of the letter, I have nothing more than to wish you good health, may God always accompany you. I know that the Coronavirus epidemic is really dangerous and is spreading in many countries. God bless and always be with you. I don't know what else to do but i always pray for you,

I always thinking for you and miss you

Daughter Y Uen

Dearest Dad,
